“To move forward as one, to heal our people and improve our health”

Deadly Choices & Wurli Join Forces

Board members Juanita Heparia, May Rosas, Deadly Choices Brenton Bowen, CEO Suzi Berto, Deadly Choices Willie Tonga, Chairperson Lisa Mumbin and Deadly Choices Bo de la Cruz

On the 20th April 2021, Wurli hosted the Partnership launch between Wurli Health Service and the Institute for Urban Indigenous Health’s Deadly Choices preventative health program.

This program is focused on bettering the lives of Aboriginal and Torres Strait Islander people by encouraging them to eat healthy, maintain exercise, avoiding smokes and alcohol and keeping up-to-date with their 715 health checks.

The launch included visiting Deadly Choices Ambassadors Bo de la Cruz, former international

Touch Rugby player and two former NRL players Willie Tonga and Brenton Bowen. Wurli thanks them for travelling to Katherine for this special event.

This new partnership encourages our clients to come get their 715 health checks. Once completed they will receive a Deadly Choices t-shirt in the following club options, NRL’s North QLD Cowboys in pink or blue, AFL’s Essendon Bombers or Hawthorn Hawks.

We encourage our clients to come in and get a health check and learn more about making better choices for your health and wellbeing.

COVID-19 Vaccination Roll-Out Underway

Wurlli Director May Rosas with Dr Carrie McKenzie and Senior Medical Officer Dr Megan Cope after their COVID vaccine at Rocky Ridge.

On the 24th March, Wurlli Director May Rosas along with Dr Carrie McKenzie and Senior Medical Officer Dr Megan Cope received their COVID-19 Pfizer vaccinations at the Rocky Ridge Aged Care Facility during the early roll-out.

The COVID vaccine Astra Zeneca is currently being rolled out to staff and Board members of Wurli who are 50 years and over. The rollout to clients will commence in the last week of April to clients 50 years and over. Wurli now has a COVID-19 Project Officer who will be coordinating the vaccination roll-out.

They will be conducting the vaccinations in the vaccinations centre at Main Clinic, 25 Third Street.

We understand there will be some hesitancy about the vaccine amongst our local community members. Wurli is preparing to do community meetings and COVID Vaccine Awareness with the first community meeting at Myalli Brumby which took place on the 19th April.

We encourage all our mob to please attend these meetings when we come to your communities. We will make sure to advertise when these meetings will be happening.

Red Lily Health Board Visit to Wurli

On the 11th February, Wurli hosted a visit with the Corporate Team from Red Lily Health Board which is located in Jabiru. Red Lily Health were in the process of setting up their Service as an Aboriginal Community Controlled Health Service (ACCHS) to look after their local community health centres.

The Red Lily Team also visited Katherine West Health Board and Sunrise Health. Stephen Hay the Acting CEO was very grateful for the sharing of knowledge and information the three Katherine Aboriginal Medical Services (AMS's) were able to provide for them.

Wurli wishes Red Lily Health Board all the very best in their endeavours.

New Staff Car Park and Bus Drop Off and Turn Around Zone

Wurli’s new staff car park was completed at the end of February 2021 which is situated at 23 Third Street where the high house used to be, which can be seen in the picture to the below right.

The new car park provides a secure place for staff to park so they no longer need to park on the vacant block on O’Shea Terrace. It is a central point between the Main Clinic, the Women’s and Children’s and WWFP program buildings for convenient access.

The new car park is part of the bigger infrastructure plan’s stage one phase which also includes removal of the undercover shade structure and installation of a new turn around zone for our transport buses (pictured above right) which was completed in March.

This has all culminated after many years of forward planning by Management and the Board. This would not have been possible without funding from the Australian Government National Indigenous Australians Agency.

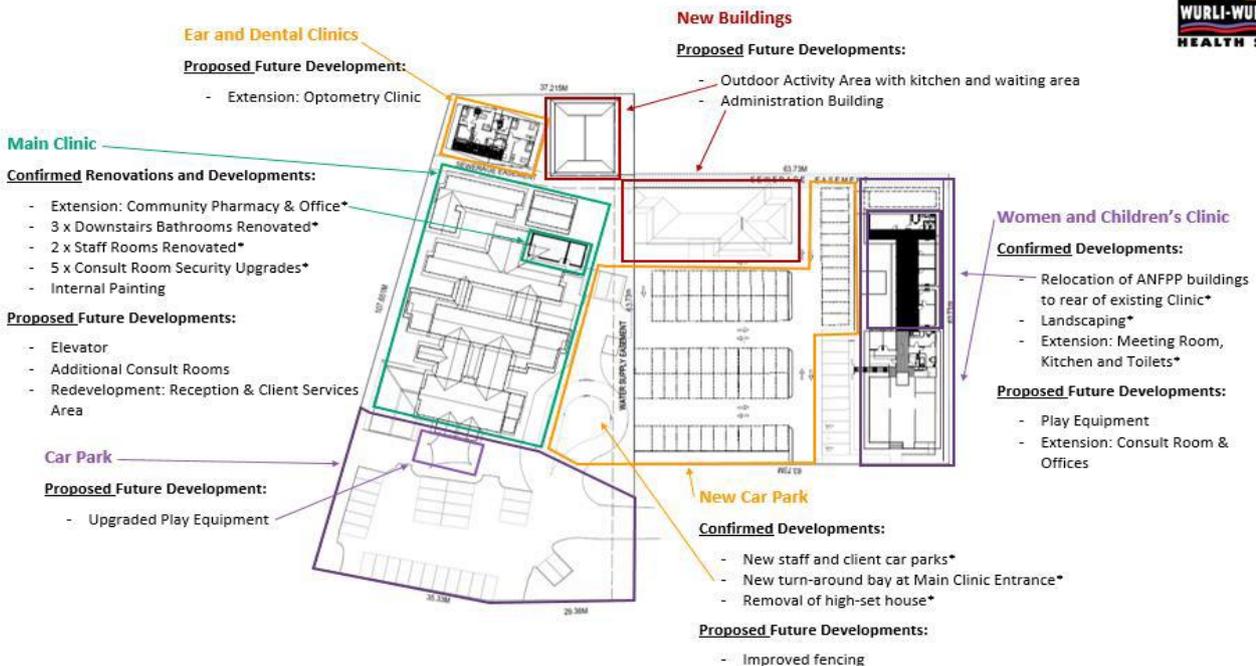

Below is the upgrades plan which is still progressing.

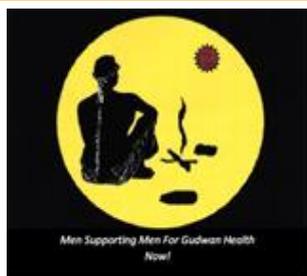

Above is the new turn around zone with a view of the new car parks. Below is the new parking lot where the high house once stood.

INFRASTRUCTURE UPGRADES ARE COMING

Wurli Men's Summit Happening in May

Wurli's StrongBala Men's Justice Program and AOD Program will be hosting Men's Summits in May 2021.

There will be events in each community around Men's Health Promotion and accessing Health and Wellbeing Services at Wurli. This will also be an opportunity for men to have input into how they would like our services accessed.

The Men's Summit will be held at the following locations:

Binjari Community	Tuesday 11th May
Rockhole Community	Wednesday 12th May
Myalli Brumby Community	Thursday 13th May
Low Level Nature Park	Wednesday 19th May
Nitmiluk Youth Camp Grounds	Thursday 20th May
Godinymayin Yijard Rivers Arts & Cultural Centre	Friday 21st May

These events will include presentations from Services providers within Wurli Wurlinjang and external service providers in relation to Men's Health and Wellbeing.

The Men's Summit' [program outline](#) will be circulated to communities with notices in the near future, keep an eye out.

Registration forms

Registration forms for the events at Low Level, Nitmiluk and the Godinymayin Cultural Centre will be required.

Support to fill out these forms can be done by contacting StrongBala Justice Program or Community Services on 89729180, they will also assist when out in communities.

Transport

Transport will be made available for the above meetings to and from events held at Low Level Nature Park, Nitmiluk Youth Camp Grounds, and the Godinymayin Cultural Centre.

Contact StrongBala or AOD staff to find out more on 8972 9180

Wurli Family Partnership Program Update

The team continue to work towards improving the health and wellbeing of families enrolled in the program.

We have been working with Relationships Australia to provide parenting education sessions and support. Valarie Tambling from Relationships Australia is running a Straight Talk parenting program. Valarie, Lachlan and George provided an education session to staff about programs that they run. Valarie also ran a session for the parents of the program which was well received.

The team recognise the importance of fathers and are looking for a male to join the team and provide additional support. If you are aware of anyone that will be interested please direct them to the Wurli website for more information.

We have also had a great visit from the National ANFPP support service. They spent some time training the staff and getting to know Wurli and Katherine. The support service were very impressed with the team and the passion and commitment demonstrated in helping families.

The team continue to work with Midwife Kim in providing antenatal classes for new mums, these classes are open to all Wurli client's to attend and occur every second fortnight on Wednesdays.

The classes provide information on pregnancy and birth

Marlee Bryce with kids Sophia and Scarlett with Nurse Margaret McBean and FPW Andrea McDonald at their graduation

and what to expect as well as an opportunity to meet other mums and share a nutritious meal together.

In February we celebrated the graduation of Marlee, Paul, Scarlet, Sophia and Phoenix. This little family have been a pleasure for the team to work with. Congratulations in completing the program and following your hearts desires.

We are excited about our new building which is behind the woman's and children's clinic. The new area will give us the space to have group activities, craft sessions and a relaxing space for families to visit. We will be settled in the new building by the end of April.

Our focus for the next few months will be on engaging dads and working with family groups in the local communities.

If you have any questions about any of our activities or the about the program please call the team on 08 89729325

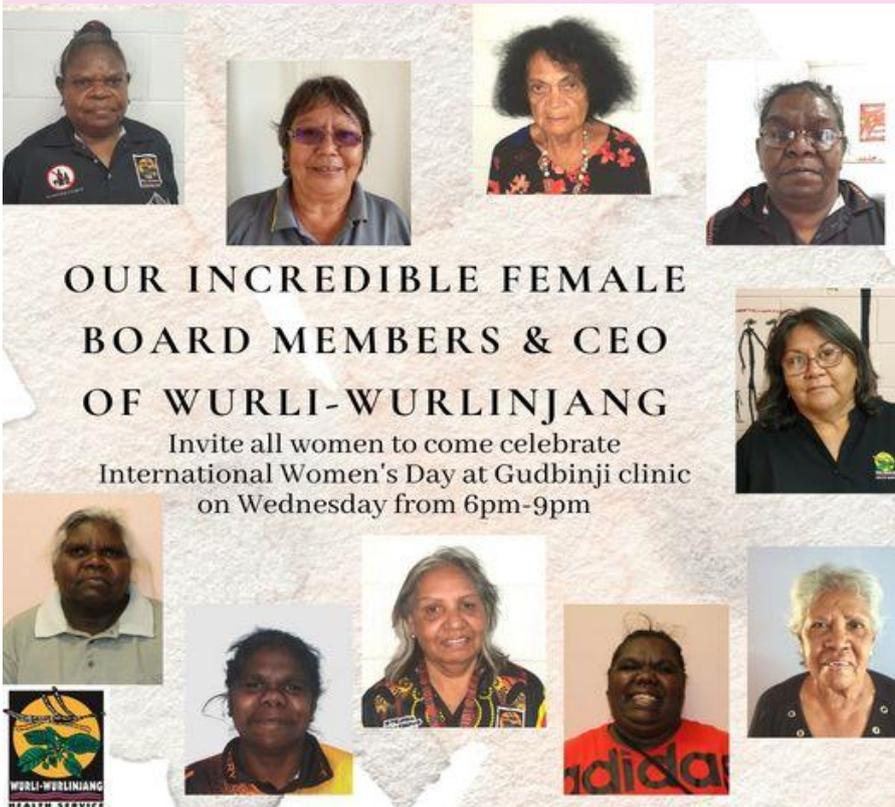

WWFPP team, Bridgette Hutchinson, Andrea McDonald, Sophie Whitford-Simoes, Renee Hillen and Micheala Mills with the ladies from National ANFPP support service Nikki McGrady, Emily May and Kym Cunningham during their visit.

HAPPY INTERNATIONAL WOMEN'S DAY

International Women's Day for 2021 was on Monday 8th March. It is an international day to celebrate all women around the world.

At Wurli we recognise and praise the Woman of Wurli and the role they each have in our organisation. Above is a few of the amazing women who work at Wurli-Wurlinjang and make this organisation strong!

OUR INCREDIBLE FEMALE BOARD MEMBERS & CEO OF WURLI-WURLINJANG

Invite all women to come celebrate International Women's Day at Gudbinji clinic on Wednesday from 6pm-9pm

A big appreciation goes towards our incredible female board members and our CEO. From top left we have Wurli's chairperson Lisa Mumbin, followed by Barbra Berto, Juanita Heparia, and Evonne Booth. In the middle is our CEO Suzi Berto. Bottom right is Marie Dowling, Melissa Rogers, May Rosas, Natasha Bronghur and Pauline Marapunya.

These strong women look after the Governance of Wurli-Wurlinjang and we would truly be lost without them.

For International Women's Day, Wurli invited all women to attend the female only after hours clinic at Gudbinji on Wednesday 10th March from 6pm-9pm. Big thank you to all who arranged and participated in this.

School Holidays Movie Fun Day

On the 21st January 2021, Wurli held a School Holidays Movie day at the Katherine STAR Cinema.

The event started at 10.30am with Kalano transport picking up lots of people from the communities and dropping them off. The cinema event held various health education material for the youth and parents to take part in.

Educational material was focusing on alcohol, drugs and smoking use and their negative health impacts. We had a quiz that asked 5 questions surrounding alcohol use, and from that we had 3 prizes drawn for the quiz winners. There was great engagement from youth partaking in the quiz and checking out what a standard drink is with the drink models.

Health education and syphilis screening was also undertaken by the SERP team. The SERP t-shirts were a huge hit among youth and parents, with over 20 point of care testing completed.

Cinema one played movies all day, the first movie was "Pursuit of Happyness", and movie two was "Million Dollar Baby". Cinema two had Headspace come and do drum playing with the youth which had great engagement. A local singer Gypsy came and played live music and afterwards she taught a few kids how to play the guitar. Steven "Tuups" Talitimu and Michael Fairweather came in and did some custom hairstyles with the youth, which the children absolutely loved.

Morning tea and lunch was catered by Dragonfly which supplied a beautiful assortment of healthy food options. No food was leftover which was great to see! Throughout the 4 hours of being there, over 100 people came through the cinema to be a part of the Youth and Family Movie Day.

A big thank you to all those involved in organising this event and those organisations and individuals who participated to provide this enjoyable fun filled day.

Immunisation Research
and Surveillance

Information about COVID-19 vaccines for Aboriginal and Torres Strait Islander People

for more information visit the NACCHO website www.naccho.org.au

Which COVID-19 vaccines will be used for Aboriginal and Torres Strait Islander people?

Most people in Australia, including Aboriginal and Torres Strait Islander people, will receive a vaccine called COVID-19 Vaccine AstraZeneca, developed by AstraZeneca and the University of Oxford. Another COVID-19 vaccine available in Australia is called Comirnaty (Pfizer vaccine). This has already been given to some Aboriginal and Torres Strait Islander people in the highest priority group. Both vaccines are safe and effective. Other vaccines may become available over time.

We would like to make it clear, the Astra Zeneca vaccine is now only given to those 50 years and over

When will Aboriginal and Torres Strait Islander people be vaccinated?

Some Aboriginal and Torres Strait Islander people have already been vaccinated, including staff working in GP respiratory clinics and aged care workers as well as Aboriginal aged care residents. The vaccine will be offered to all Aboriginal and Torres Strait Islander adults from late March 2021.

Children rarely get very sick with COVID 19. No vaccine has yet been approved for use in people under the age of 16 years but some trials are underway in older children and children may be offered the vaccine in future.

Why have Aboriginal and Torres Strait Islander people been prioritised to receive the vaccine?

Aboriginal and Torres Strait Islander adults have been prioritised at the request of Aboriginal and Torres Strait Islander health leaders. We have seen the devastation that COVID-19 can cause in First Nations communities in other countries around the world because of the high number of people with chronic conditions like diabetes and more crowded living conditions.

The vaccines have been shown to decrease the chances of someone becoming severely unwell or dying with COVID-19. Vaccination is particularly important for those at the highest risk of severe COVID-19 illness - our elders and those with chronic conditions. The more the number of people who have the vaccine, the less impact COVID-19 will have on the community.

Are COVID-19 vaccines safe for elders?

COVID-19 vaccines are safe and have been tested in the elderly. It is important we protect our elders. Around the world, millions of elderly people, including First Nations elders, and people with chronic conditions like diabetes have been vaccinated. Early information from countries that are using these vaccines shows they are effective at preventing older people (including people aged above 80 years) from being very unwell and needing hospitalisation if they get COVID-19.

Generally people getting the vaccine will likely have some mild side effects for a day or so after their vaccination. This can sometimes feel a bit like having the flu for a day or so, but disappears quickly. In the trials these side effects have been milder and less common in older adults than younger adults.

Is COVID-19 vaccine safe for people with existing medical and chronic conditions?

Both COVID-19 vaccines used in Australia are considered to be safe in people with existing medical and chronic conditions and are recommended for these people because they are at increased risk of severe illness with COVID-19 infection. Both vaccines are recommended for people with immunocompromise; however, the vaccines may be less effective in immunocompromised people, because the vaccines rely on your immune system to build a response. This means that it's important to continue other protective measures against COVID-19, even after vaccination.

The Hon. Scott Morrison MP
Prime Minister

The Hon. Greg Hunt MP
Minister for Health and Aged Care

JOINT MEDIA STATEMENT

Thursday 8 April 2021

ASTRAZENECA COVID-19 VACCINE

Earlier this evening the Australian Government received advice from the vaccine expert taskforce, the Australian Technical Advisory Group on Immunisation (ATAGI).

The detail of that advice is attached.

The Government accepts the advice from Australia's medical experts and will move swiftly to ensure Australia's vaccination program and advice to patients is adjusted accordingly.

The Australian Government places safety above all else, as it has done throughout the pandemic, and will continue to follow the medical advice in protecting Australians.

The ATAGI advice is clear that the AstraZeneca COVID-19 vaccine is highly effective in preventing severe disease caused by COVID-19.

The medical advice to the Government is that the risk of blood clotting side effects from the AstraZeneca vaccine is four to six in one million people, in the first four to 20 days post the vaccine. This is a rare but serious side effect.

On that basis, the recommendation is that it is preferred that the Pfizer vaccine be provided to adults under the age of 50. The AstraZeneca vaccine should only be given as a first dose to adults under the age of 50 where the benefit clearly outweighs the risk for that individual.

AstraZeneca is recommended for those over the age of 50.

The vaccination program will continue, particularly for the most vulnerable Australians in Phase 1B including those over the age of 70 who are not impacted by this revised advice.

The longer term timeframe for the program is being reviewed following this medical advice.

The Department of Health will provide preliminary, updated advice to general practitioners and health professionals.

The ATAGI advice follows further international evidence including from the vaccinations in Europe and the United Kingdom. ATAGI had already provided updated guidance on 2 April.

The ATAGI advice has today been considered by the Australian Health Protection Principal Committee (AHPPC), which is the Medical Expert Panel led by the Chief Medical Officer, and also comprising all State and Territory Chief Health Officers.

The advice will be provided to National Cabinet tomorrow.

[ENDS]

National Condom Day 2021

Preetpal Gill and Daniel Rosas from the Syphilis Enhanced Response Program at the town square

National Condom Day and Wurli Sexual Health Promotion Ads

On Friday 12th of February the Syphilis Enhanced Response Program (SERP) and Health Promotions set up a stall in the Town Square to celebrate the upcoming National Condom Day on Feb 14th AKA Valentines Day.

As pedestrians walked past the team offered fresh fruit, information, a laugh and of course Condoms!

SERP and Health Promotion have also been working on developing a series of videos for TV and social media to promote safe sex and the ease of coming to Wurli for testing and treatment.

Our first ad is being shown on Channel 9/ Imparja and has been uploaded to the Wurli Facebook page with

great feedback.

Our story begins with a young couple going out for Valentine's Day but are not oblivious to the fact it is also National condom day. Some videos in future will follow the journey of the young couple as they contemplate their own sexual health.

Over the coming months we will be filming and rolling out more videos so apologies for any disruptions around the organisation but cooperation is appreciated.

Also we are always looking for young people 18 – 25 who would like to be in the ads, so spread the word around to friends and family. It is a good opportunity for them to earn some vouchers, have fun, promote sexual health and be a leader in their community.

World Salt Awareness Week!

More Flavour, Less Salt!

Did you know that in 450g serve of tinned beef there is 2 teaspoons of salt!

Less than 1 teaspoon of salt is recommended per day. Try to eat less salt, your heart will love you for it.

What would you choose?

WORLD HEARING DAY AND HEARING AWARENESS WEEK

Between the 1st - 5th March marked the annual World Hearing Day and Hearing Awareness Week for 2021. It marks the launch of the World Report on Hearing – presenting a global call for action to address hearing loss and ear diseases across the life course.

The theme for the 2021 is Hearing Care for ALL – Screen. Rehabilitate. Communicate.

Here at Wurli Wurlinjang Health Service, we have staff who have experienced hearing loss in their life time, including RAHP Selena Brown, a Darribullum-Bunda & Yarrabah woman who works within the ITC/Outreach Program at Gudbinji Clinic.

Selena has been hearing impaired since birth, having been born deaf, with profound hearing loss in her left ear, and severe hearing loss in her right, in which she wears a hearing aid.

Along with her personal experiences as a hearing-

impaired person, Selena has seen firsthand the disadvantages and social detriments affecting those with hearing disabilities within communities and in other areas across Australia. Selena is also part of various advocacy groups such as the “Your Story Advocacy Group”, helping raise awareness of hearing disabilities and raising awareness across various social media platforms in the hopes of spreading the message about hearing loss across members of society.

Clients were encouraged to come into the clinic to find out more about hearing loss, or share any concerns about their own hearing loss.

Wurli After Hours Clinics

Don't forget the After Hours Clinics are still operating as follows:

Tuesday and Thursday nights are out in the clinical van, rotating communities and town areas each week.

Wednesday nights at Gudbinji Clinic

From 6-9pm

Contact 89729 157 for more information
